## 2. Basis of preparation and significant accounting policies:

Statement of compliance:

These Financial Statements have been prepared using accounting policies consistent with International Financial Reporting Standards ("IFRS") and in accordance with International Accounting Standard 34, "Interim Financial Reporting" as issued by the International Accounting Standards Board. These Financial Statements have been prepared using accounting policies and judgments which are consistent with Notes 3 and 4 of the audited annual consolidated financial statements as at December 31, 2016 and for the years ended December 31, 2016 and 2015 as filed on SEDAR at www.sedar.com and, as such, they should be read in conjunction with the said statements.

These Financial Statements were approved for issuance by Western's Board of Directors on April 26, 2017.

Functional and presentation currency:

These Financial Statements are presented in Canadian dollars, which is Western's functional currency.

#### 3. Seasonality:

The Company's operations are often weather dependent, which has a seasonal effect. During the first quarter, the environment in the field is conducive to oilfield activities including frozen conditions allowing crude oil and natural gas companies to move heavy equipment to otherwise inaccessible areas and the resulting demand for services, such as those provided by the Company, is typically high. The second quarter is normally a slower period in Canada, due to the spring thaw and wet conditions creating weight restrictions on roads and reducing the mobility of heavy equipment, which slows activity levels in the industry. The third and fourth quarters are usually representative of average activity levels. Therefore, interim periods may not be representative of the results expected for the full year of operation due to seasonality.

## 4. Operating segments:

The Company operates in the oilfield service industry through its contract drilling segment in Canada and the United States, and through its production services segment in Canada. Contract drilling includes drilling rigs along with related ancillary equipment and provides services to oil and natural gas exploration and production companies. Production services includes well servicing rigs and related equipment, as well as oilfield rental equipment and provides services to oil and natural gas exploration and production companies and in the case of oilfield rental equipment, to other oilfield service companies as well.

The Company's President & Chief Executive Officer and Senior Vice President, Finance & Chief Financial Officer ("Executive Management") review internal management reports for these operating segments on at least a monthly basis.

Information regarding the results of the operating segments is included below. Performance is measured based on operating earnings, as included in internal management reports. Operating earnings is used to measure performance as management believes that such information is the most relevant in evaluating the results of certain operating segments relative to other entities that operate within these industries. Operating earnings is calculated as revenue less operating expenses (excluding stock based compensation) and administrative expenses (excluding stock based compensation).

#### **Credit facilities:**

The Company has a \$50.0 million syndicated revolving credit facility (the "Revolving Facility") and a \$10.0 million committed operating facility (the "Operating Facility" and together the "Credit Facilities"). As at March 31, 2017, in addition to the \$60.0 million of available credit under the Credit Facilities, Western had access to an accordion feature whereby an incremental \$50.0 million of borrowing would become available, subject to the approval of the lenders. During the covenant relief period, which began on January 1, 2016 and ends after December 31, 2017, there are restrictions on exercising the accordion and on certain payments made by the Company, including dividends, share repurchases and capital expenditures. The Credit Facilities mature on December 17, 2018.

Additionally, advances under the Credit Facilities will be limited by the Company's borrowing base. The borrowing base is determined as follows:

- 85% of investment grade accounts receivable; plus
- 75% of non-investment grade accounts receivable; plus
- 25% of the net book value of property and equipment (to a maximum of \$40.0 million, with a seasonal increase to \$50.0 million each guarter ending June 30).

Amounts borrowed under the Credit Facilities bear interest at the bank's Canadian prime rate, US base rate, LIBOR or the banker's acceptance rate plus an applicable margin depending, in each case, on the ratio of Consolidated Debt to Consolidated EBITDA as defined by the Credit Facilities agreement.

The Credit Facilities are secured by the assets of Western and its subsidiaries. As at March 31, 2017, the Revolving Facility and the Operating Facility were undrawn.

#### 14. Financial risk management and financial instruments:

The Company's financial instruments include cash and cash equivalents, trade and other receivables, trade payables and other current liabilities, derivatives and long term debt instruments such as the Credit Facilities and the Senior Notes. Cash and cash equivalents and derivatives are carried at fair value. The carrying amounts of trade and other receivables, trade payables, and other current liabilities approximate their fair values due to their short term nature. The Credit Facilities bear interest at rates that approximate market rates and therefore their carrying values approximate fair values. The Senior Notes are recorded at their amortized cost. Fair value disclosure of the Senior Notes is based on their trading price on March 31, 2017.

The Company's areas of financial risk management and risks related to financial instruments remained unchanged from December 31, 2016.

Financial assets and liabilities recorded at fair value in the condensed consolidated balance sheets are categorized based upon the level of judgment associated with the inputs used to measure their fair value. Hierarchical levels based on the amount of subjectivity associated with the inputs in the fair value determination of these assets and liabilities are as follows:

Level I – Inputs are unadjusted, quoted prices in active markets for identical assets or liabilities at the measurement date.

Level II – Inputs (other than quoted prices included in Level I) are either directly or indirectly observable for the asset or liability through correlation with market data at the measurement date and for the duration of the instrument's anticipated life.

Level III – Inputs reflect management's best estimate of what market participants would use in pricing the asset or liability at the measurement date. Consideration is given to the risk inherent in the valuation technique and the risk inherent in the inputs to the model.

The Company's cash and cash equivalents balance, derivatives and Senior Notes are the only financial assets or liabilities measured using fair value. The Company's cash and cash equivalents are categorized as Level I as there are quoted prices in an active market for these instruments. The estimated fair value of derivatives and the Senior Notes is based on Level II inputs as the inputs are directly observable through correlation with market data.
