1. Reporting entity:

Western Energy Services Corp. ("Western") is a company domiciled in Canada. The address of the head office is 1700, 215 - 9th Avenue SW, Calgary, Alberta. Western is a publicly traded company that is listed on the Toronto Stock Exchange ("TSX") under the symbol "WRG". These condensed consolidated financial statements as at and for the three and nine months ended September 30, 2019 and 2018 (the "Financial Statements") are comprised of Western, its divisions and its wholly owned subsidiaries (together referred to as the "Company"). The Company is an oilfield service company providing contract drilling services through its division, Horizon Drilling ("Horizon") in Canada, and its wholly owned subsidiary, Stoneham Drilling Corporation ("Stoneham") in the United States. Western provides well servicing and oilfield rental equipment services in Canada through its wholly owned subsidiary Western Production Services Corp. ("Western Production Services"). Western Production Services' division, Eagle Well Servicing ("Eagle") provides well servicing operations, while its division, Aero Rental Services ("Aero") provides oilfield rental equipment services. Stoneham's division, Western Oilfield Services, provides well servicing operations in the United States. Financial and operating results for Horizon and Stoneham are included in Western's contract drilling segment, while financial and operating results for Eagle, Aero, and Western Oilfield Services are included in Western's production services segment.

2. Basis of preparation and significant accounting policies:

Statement of compliance:

These Financial Statements have been prepared using accounting policies consistent with International Financial Reporting Standards ("IFRS") and in accordance with International Accounting Standard ("IAS") 34, "Interim Financial Reporting" as issued by the International Accounting Standards Board. The condensed consolidated interim financial statements do not include all of the information required for full annual financial statements and should be read in conjunction with the consolidated financial statements of the Company as at and for the years ended December 31, 2018 and 2017. Except for standards adopted in the period as detailed in Note 4, these Financial Statements have been prepared using accounting policies and estimates which are consistent with Notes 3 and 4 of the audited annual consolidated financial statements as at December 31, 2018 and for the years ended December 31, 2018 and 2017 as filed on SEDAR at www.sedar.com.

These Financial Statements were approved for issuance by Western's Board of Directors on October 23, 2019.

Functional and presentation currency:

These Financial Statements are presented in Canadian dollars, which is Western's functional currency.

Reclassification of depreciation and stock based compensation:

Beginning in the third quarter of 2019, the Company reclassified specific expenses to better align the expenses with management's review of the performance and disclosure of its operating segments. Depreciation and stock based compensation expenses were previously grouped with operating and administrative expenses. The Company has reclassified these costs in the condensed consolidated statement of operations and comprehensive income. Historical results were reclassified to match the current period presentation. The reclassification did not impact operating loss, loss before income taxes, net loss or earnings per share. Management believes the reclassifications described above, now align the nature of the costs presented with the assessment of performance of each operating segment.

The following table shows the impact of the reclassification on the Company's statement of operations and comprehensive income for the three and nine months ended September 30, 2018:

Notes to the condensed consolidated financial statements (unaudited) (tabular amounts are in thousands of Canadian dollars, except common share and per common share amounts)

3. Seasonality:

The Company's operations are often weather dependent, which has a seasonal effect. During the first quarter, the environment in the field is conducive to oilfield activities including frozen conditions allowing crude oil and natural gas exploration and production companies to move heavy equipment to otherwise inaccessible areas and the resulting demand for services, such as those provided by the Company, is typically high. The second quarter is normally a slower period in Canada, as the spring thaw and wet conditions create weight restrictions on roads, reducing the mobility of heavy equipment, which slows activity levels in the industry. The third and fourth quarters are usually representative of average activity levels. Therefore, interim periods may not be representative of the results expected for the full year of operation due to seasonality.

4. Standards adopted in the period:

As at January 1, 2019, the Company adopted the following standard:

IFRS 16 - Leases:

Effective January 1, 2019, the Company adopted IFRS 16, Leases, which removes the distinction between operating and finance leases and requires the Company to recognize a right of use asset ("finance lease asset") and lease liability ("finance lease obligation") at the start of all leases, except for short term leases, defined as leases with a term of less than one year, as well as leases where the underlying asset is of low value.

The Company elected to apply the practical expedients in IFRS 16 related to short term leases, as well as leases where the underlying asset is of low value. Lease payments related to these leases are expensed on a straight line basis over the lease term and included in the consolidated statement of operations and comprehensive income. The expense related to short term and low value leases is disclosed in Note 7.

The Company used the modified retrospective method upon adoption, which requires the cumulative effective of adopting IFRS 16 to be recognized as an adjustment to the opening balance of retained earnings. The prior year balances were not adjusted. The following table shows the impact of adopting IFRS 16 on the Company's balance sheet:

4. Standards adopted in the period (continued):

The following table shows the impact of adopting IFRS 16 on the Company's statement of operations and comprehensive income:

	Three m	onths ended	Nine months ended
	Septem	ber 30, 2019	September 30, 2019
Incremental interest on long term debt	\$	168	\$ 534

Net impact of adopting IFRS 16	\$	5	\$ 5

The Company's finance lease assets and finance lease obligations policy under IFRS 16 is as follows:

Finance lease assets:

The Company has lease agreements for items including office space, vehicles, shops and office equipment which qualify as leased assets under IFRS 16. The Company's vehicle leases were capitalized under the previous lease standard, IAS 17, as leased assets.

At the inception of an arrangement, the Company determines whether such an arrangement is or contains a finance lease under IFRS 16. An agreement which results in the Company having the right to control the use of an asset over a period of time with set payments is considered a finance lease. Finance lease assets are capitalized at the date the lease commences and are comprised of the initial lease liability, less any lease incentives received. Depreciation is calculated based on the initial cost of the asset and recognized in net income on a straight line basis over the estimated useful life of the lease. The finance lease assets are included in property and equipment on the consolidated balance sheet and segregated in Note 6.

Finance lease obligations:

The adoption of IFRS 16 requires the Company to make judgments that affect the valuation of finance lease obligations and the corresponding finance lease assets, including whether a contract falls within the scope of IFRS 16, the term of the lease, and determining the interest rate used for discounting future cash flows. The finance lease obligations, and the corresponding finance lease assets, at inception of the agreement are measured at the present value of the fixed lease payments, discounted using the Company's incremental borrowing rate at the inception of the agreement. As at January 1, 2019, the date of transition, the Company's incremental borrowing rate was based on the terms of its Credit Facilities. Payments made related to the finance lease obligations are allocated between finance costs and the reduction of the outstanding finance lease obligations. The finance lease obligations are included in Note 7.

Finance costs are allocated to each period during the lease term using the effective interest rate method. Lease modifications, where the scope increases in exchange for additional corresponding consideration, are accounted for as a separate lease. The lease term includes the non-cancellable period of the lease agreement and periods covered by any option to renew, where it is reasonably certain that the option will be exercised.

The following reconciliation includes the Company's operating lease commitments at December 31, 2018, compared to the Company's finance lease obligations as at the date of transition of January 1, 2019:

	January	1, 2019
Operating lease commitments at December 31, 2018	\$	21,107
Current leases with a lease term of less than one year		(68)
Office operating costs and building amenities		(5,966)

Gross lease liabilities at January 1, 2019		14,999

Finance lease obligations at January 1, 2019	\$	12,825

Notes to the condensed consolidated financial statements (unaudited) (tabular amounts are in thousands of Canadian dollars, except common share and per common share amounts)

4. Standards adopted in the period (continued):

Revenue from contracts:

In addition to being a lessee as described previously, the Company is also a lessor with respect to some of its drilling rig contracts. The Company has short term and long term drilling rig contracts, with short term contracts being less than one year and long term contracts being greater than one year. Western has elected to use the practical expedient under IFRS 16.5 for its short term drilling contracts, which scopes out contracts less than one year. For its long term drilling contracts, the Company is considered a lessor. As such, the Company has disclosed its revenue in Note 5 between revenue from short term contracts and revenue from long term contracts.

5. Operating segments:

The Company operates in the oilfield service industry through its contract drilling segment and through its production services segment in both Canada and the United States. Contract drilling includes drilling rigs along with related ancillary equipment and provides services to crude oil and natural gas exploration and production companies. Production services includes well servicing rigs and related equipment, as well as oilfield rental equipment and provides services to crude oil and natural gas exploration and production companies and in the case of oilfield rental equipment, to other oilfield service companies.

The Company's President & Chief Executive Officer and Senior Vice President, Finance, Chief Financial Officer & Corporate Secretary ("Executive Management") review internal management reports for these operating segments on at least a monthly basis.

Information regarding the results of the operating segments is included below. Performance is measured based on operating earnings (loss), as included in internal management reports. Operating earnings (loss) is used to measure performance as management believes that such information is the most relevant in evaluating the results of certain operating segments relative to other entities that operate within these industries. Operating earnings (loss) is calculated as revenue less operating expenses, administrative expenses, and depreciation.

The following is a summary of the Company's results by operating segment for the three and nine months ended September 30, 2019 and 2018:

7. Long term debt (continued):

Credit Facilities:

At September 30, 2019, the Company's credit facilities consisted of a \$50.0 million syndicated revolving credit facility (the "Revolving Facility") and a \$10.0 million committed operating facility (the "Operating Facility" and together the "Credit Facilities") which mature on December 17, 2021.

Advances under the Credit Facilities are limited by the Company's borrowing base. The borrowing base is applicable when either (i) more than \$40.0 million is drawn under the Credit Facilities or (ii) the net book value of Western's property and equipment is less than \$300.0 million. The borrowing base is determined as follows:

- 85% of investment grade accounts receivable; plus
- 75% of non-investment grade accounts receivable; plus
- 25% of the net book value of property and equipment to a maximum of \$40.0 million.

As at September 30, 2019, the borrowing base calculation was not applicable as the Company had less than \$40.0 million drawn on its Credit Facilities and the net book value of the Company's property and equipment was greater than \$300.0 million.

Amounts borrowed under the Credit Facilities bear interest at the bank's Canadian prime rate, or the banker's acceptance rate plus an applicable margin depending, in each case, on the ratio of Consolidated Debt to Consolidated EBITDA as defined by the Credit Facilities agreement. The Credit Facilities are secured by the assets of the Company and its subsidiaries.

The Company's Credit Facilities are subject to the following financial covenants:

	Covenant ⁽¹⁾	September 30, 2019
Maximum Consolidated Senior Debt to Consolidated EBITDA Ratio (2)(3)	3.0:1.0 or less	0.64:1.0
Maximum Consolidated Debt to Consolidated Capitalization Ratio (4)(5)	0.6:1.0 or less	0.41:1.0
Minimum Current Ratio ⁽⁶⁾	1.15:1.0 or more	2.37:1.0

- (1) The Company's covenant calculations use IFRS in effect as at December 31, 2018 and therefore, at September 30, 2019, exclude the impact of adopting IFRS 16, Leases.
- (2) Consolidated Senior Debt in the Credit Facilities is defined as indebtedness under the Revolving Facility, Operating Facility and vehicle finance lease obligations; reduced by all cash and cash equivalents.
- (3) Consolidated EBITDA in the Credit Facilities is defined on a trailing twelve month basis as consolidated net income (loss), plus interest, income taxes, depreciation and amortization and any other non-cash items or extraordinary or non-recurring losses, less gains on sale of property and equipment and any other non-cash items or extraordinary or non-recurring gains that are included in the calculation of consolidated net income.
- (4) Consolidated Debt in the Credit Facilities is defined as Consolidated Senior Debt plus outstanding principal on unsecured debt, including the Second Lien Facility.
- (5) Consolidated Capitalization in the Credit Facilities is defined as the aggregate of Consolidated Debt and total shareholders` equity as reported on the consolidated balance sheet.
- (6) Current Ratio is defined as the ratio of current assets to current liabilities as reported on the consolidated balance sheet, where current liabilities exclude the current portion of long term debt and accrued interest.

As at September 30, 2019, the Company was in compliance with all covenants related to its Credit Facilities. The adoption of IFRS 16 did not have an impact on the Company's Credit Facility covenants.

Second Lien Facility:

At September 30, 2019, the Company had \$212.3 million outstanding on the second lien secured term loan facility (the "Second Lien Facility"). Interest is payable semi-annually, at a rate of 7.25% per annum, on January 1 and July 1 each year. Amortization payments equal to 1% of the initial principal amount of \$215.0 million are payable annually, in quarterly installments, with the balance due on January 31, 2023.

8. Share capital:

The Company is authorized to issue an unlimited number of common shares. The following table summarizes Western's common shares:

	Issued and	
	outstanding shares	Amount
Balance at December 31, 2018	92,305,542	\$ 441,512
Issued on vesting of restricted share units	195,772	283
Balance at September 30, 2019	92,501,314	\$ 441,795

There were no dividends declared during the three and nine months ended September 30, 2019 and 2018.

9. Stock based compensation:

Stock options:

The Company's stock option plan provides for stock options to be issued to directors, officers, employees and consultants of the Company so that they may participate in the growth and development of Western. Subject to the specific provisions of the stock option plan, eligibility, vesting period, terms of the options and the number of options granted are to be determined by the Board of Directors at the time of grant. The stock option plan allows the Board of Directors to issue up to 10% of the Company's outstanding common shares as stock options, provided that, when combined, the maximum number of common shares reserved for issuance under all stock based compensation arrangements of the Company does not exceed 10% of the Company's outstanding common shares.

The following table summarizes the movements in the Company's outstanding stock options:

	Stock options	٧	Veighted average
	outstanding		exercise price
Balance at December 31, 2018	8,313,537	\$	3.55

Expired	(1,371,677)		9.37
Balance at September 30, 2019	8,108,816	\$	1.91

For the three and nine months ended September 30, 2019 and 2018, no stock options were cancelled. The average fair value of the stock options granted for the three and nine months ended September 30, 2019 was \$0.08 per stock option (for the three and nine months ended September 30, 2018: \$0.25 per stock option). As at September 30, 2019, Western had 4,154,542 (December 31, 2018: 4,246,448) exercisable stock options outstanding at a weighted average exercise price equal to \$3.16 (December 31, 2018: \$5.82) per stock option.

Restricted share unit plan:

The Company's restricted share unit ("RSU") plan provides RSUs to be issued to directors, officers, employees and consultants of the Company so that they may participate in the growth and development of Western. Subject to the specific provisions of the RSU plan, eligibility, vesting period, terms of the RSUs and the number of RSUs granted are to be determined by the Board of Directors at the time of the grant. The RSU plan allows the Board of Directors to issue up to 5% of the Company's outstanding common shares as equity settled RSUs, provided that, when combined, the maximum number of common shares reserved for issuance under all stock based compensation arrangements of the Company does not exceed 10% of the Company's outstanding common shares.

The following table summarizes the movements in the Company's outstanding RSUs:

	Equity settled	Cash settled	Total
Balance at December 31, 2018	543,997	1,054,475	1,598,472
