**Part II Organizational Action** Attach additional statements if needed. See back of form for additional questions.

**14** Describe the organizational action and, if applicable, the date of the action or the date against which shareholders' ownership is measured for the action ▶

**On June 22, 2011, Western Energy Services Corp. completed a 20:1 share consolidation of all its outstanding common shares.**

**15** Describe the quantitative effect of the organizational action on the basis of the security in the hands of a U.S. taxpayer as an adjustment per share or as a percentage of old basis ▶

**The basis of each security held would be consolidated such that each share is worth 20 times more than the previously held share. However, the stock consolidation results in an overall reduction in the outstanding common shares in the market at a factor of 20:1 and therefore each US taxpayers would hold 1 share for every 20 shares the US taxpayer previously held.**

**16** Describe the calculation of the change in basis and the data that supports the calculation, such as the market values of securities and the valuation dates ▶

**The total number of shares outstanding was reduced at a factor of 20:1 and the value of the remaining shares increased at a factor of 1:20. For example, a US taxpayer holding 100 shares with a basis of \$5.00 per share before the stock consolidation would hold 5 shares with a basis of \$100.00 per share after the stock consolidation.**
